

Healthcare Data Specialists

Since 1979 our network of healthcare information technology experts has become a Virtual Network of EHR/ERP/ECM Subject Matter Experts & Data Specialists that brings together the most knowledgeable team of Healthcare IT professionals. Leveraging state-of-the-art technology, our teams are poised to engage at a moment's notice. Through innovative customized services and products, the best solution(s) will be achieved, guaranteeing Palmetto Solutions will exceed customer expectations.

SERVICES

- **Robotic Process Automation (RPA)** – Guaranteed accuracy with over 30 years of experience automating manual tasks inhouse and remote with an innovative Robotics Process Automation (RPA) team that is second to none.
- **Healthcare Interoperability** – Accurately sharing of information between systems, medical devices, and organizations through HIM integration, FHIR® healthcare data exchange, and custom interfaces within the four (4) levels of interoperability as defined by HIMSS: Foundational, Structural, Semantic, & Organizational.
- **Data Extraction & Migration** – Extracting all datasets (discrete database fields, 'calculated values' that are not in the database, vendor encoded documents, scanned documents, images) from the vendor database or file system, normalizing the data, cross-referencing, mapping, and transforming into any format for migration by our Migration Implementation Teams.
- **Data Modeling & Training** – With a deep understanding of all EHR/ERP/ECM vendor databases and file systems (structures, interconnections, field level uniqueness, accessing the raw data) all discrete database fields, 'calculated values' that are not in the database, encoded documents, scanned documents, and images are guaranteed accessible. Our *Healthcare Data Specialists* provide data modeling services, and in-depth remote or on-site training.
- **Software Solutions** – Innovative software based on in-depth knowledge of the EHR enterprise environment that fills the void between the EHR/ERP/ECM offering with relevant and efficient solutions.
 - **DATAcoast™ Solutions Suite** – A Legacy Data Solution (Data Archive) that provides a unique, customizable approach, that guarantees ALL data will be available accurately just as it was originally across multiple vendor platforms.
 - **Data Modeling Assistant (DMAssistant™)** – A Data Modeling tool used in analyzing and understanding any SQL database structure. Current EHR databases: Allscripts Paragon, MEDITECH Magic & C/S, and Epic.

See the Solutions White Paper for more details on these Palmetto Software Solutions.
